

ERICK PÉREZ GUTIÉRREZ

Junior DevOps Engineer | CI/CD & Containerization

San José, Costa Rica · +506 6064-6370 · ericksuper80@hotmail.com

Portfolio: portfolioerickdev.netlify.app · LinkedIn: linkedin.com/in/erick-perez88 · GitHub: github.com/ericksuper8000-source · GitLab: gitlab.com/ericksuper80

PROFESSIONAL SUMMARY

DevOps-focused engineer building and operating complete software delivery pipelines: GitHub Actions and GitLab CI, Docker containerization, multi-registry image publication and automated deployments with Watchtower. Five-plus years of enterprise operations background provides strong QA discipline, process rigor and cross-team coordination. Currently completing a DevOps Engineering program and running hands-on Linux lab environments (Debian) through a structured learning path covering VPS deployment, Nginx and cloud infrastructure. Available immediately for junior DevOps, CI/CD and platform roles.

CORE SKILLS

CI/CD: GitHub Actions, GitLab CI/CD, pipeline design (lint → test → build → publish), YAML, stages/jobs, secrets management

Containerization: Docker, Docker Compose, Dockerfile authoring, multi-registry publication (Docker Hub, GHCR, GitLab Container Registry), Watchtower auto-deploy, image lifecycle

Version Control: Git, branch strategies (master/develop), GitHub, GitLab mirror repositories, conventional commits

Operating Systems: Linux (Debian), Windows, Shell/Bash scripting (in progress)

Testing & Quality: pytest, flake8, Black, automated quality gates in CI

Cloud (studying): AWS fundamentals — EC2, S3, IAM, VPC, RDS, ECS/Fargate

Scripting & Automation: Python (automation, FastAPI, Pandas), REST APIs, cron concepts

PROFESSIONAL EXPERIENCE

Senior Campaign Specialist & Automation Validation

Catalina Marketing — Costa Rica | Nov 2023 – Dec 2025

- Reduced critical delivery errors to zero by implementing automated validation and data normalization checks across enterprise deployment workflows.
- Managed multi-step campaign deployment operations on Salesforce and WordPress with rigorous process control; promoted ahead of schedule for operational excellence.
- Volunteered on platform-wide production support requests, coordinating cross-functional operational workflows.
- Mentored peers on verification techniques and workflow optimization.

QA Automation & Deployment Validation

Cheetah Digital — Costa Rica | Sep 2021 – Oct 2023

- Architected a complete QA optimization framework that reduced campaign review time by 25%.
- Orchestrated monthly deployment schedules managing large datasets, list segmentation logic and platform configurations with 100% accuracy.
- Collaborated as primary technical contact with stakeholders in the US, Europe, Asia and Brazil.
- Managed sensitive client data with strict governance and security compliance.

Data Operations & Campaign Specialist

Experian — Costa Rica | Oct 2019 – Aug 2020

- Supported data mapping, API integrations and secure import/export pipelines for Fortune 500 accounts (Disney, Starbucks, The New York Times).

PROJECTS & PORTFOLIO

CI/CD Pipeline Labs (flagship) | github.com/ericksuper8000-source/proyecto1 · gitlab.com/ericksuper80-group/repo2

- Designed a full delivery pipeline: GitHub Actions + GitLab CI with lint, test and Docker stages; a single image built once and published to three registries (Docker Hub, GHCR, GitLab Container Registry).
- Implemented local continuous deployment with Docker Compose + Watchtower (auto-recreate on new image) including restart policies and image lifecycle management.
- Applied Git flow (master/develop), conventional commits and mirrored repositories on GitHub and GitLab.

Linux DevOps Labs — Debian virtual server administration

- Hands-on Debian 13 environment (VirtualBox): SSH, user and permission management, snapshots; 45-lab roadmap toward VPS deployment (Nginx, Let's Encrypt, firewalls, monitoring).

WhatsApp Finance Assistant — multi-service stack

- Docker Compose stack with 4 services (app, worker, Redis, PostgreSQL), GitHub Actions + GitLab CI and 48 automated pytest tests.

EDUCATION & CERTIFICATIONS

- DevOps Engineering Program — EducacionIT (in progress, expected 2027): cloud architecture, CI/CD patterns, software engineering lifecycle.
- Advanced AI-Assisted Engineering & Spec-Driven Development (SDD) — Big School: technical blueprint design, token-efficient architecture, AI tooling.
- Backend Architecture with FastAPI — specialized training (4 hrs): RESTful API routing, async logic, Pydantic validation.
- Relational Databases & SQL Design — intensive course (20 hrs): normalization, complex queries, data integrity.
- Advanced Python & Desktop Applications — independent study (80+ hrs): OOP, data validation, Tkinter GUI development.
- Database Analysis — Platzi (2020) · Web Development School — Platzi (2021).
- Technical Degree in Web Design — Universidad Fidélitas (2014).
