

ERICK PÉREZ GUTIÉRREZ

Junior Python Developer | FastAPI & Backend Engineering

San José, Costa Rica · +506 6064-6370 · ericksuper80@hotmail.com

Portfolio: portfolioerickdev.netlify.app · LinkedIn: linkedin.com/in/erick-perez88 · GitHub: github.com/ericksuper8000-source · GitLab: gitlab.com/ericksuper80

PROFESSIONAL SUMMARY

Junior Python developer focused on backend engineering with FastAPI, building on 5+ years of enterprise operations experience validating high-volume systems for Fortune 500 brands (Disney, Wells Fargo, The New York Times). Strong foundation in Python (OOP, Pandas, NumPy, Pydantic), SQL/PostgreSQL, testing with pytest, and version control with Git. Currently completing a DevOps Engineering program while building hands-on portfolio projects: REST APIs, data analysis tools and a production-style CI/CD pipeline. Known for data-accuracy discipline, an automation mindset and fast, self-directed learning. Available immediately.

CORE SKILLS

Languages: Python, SQL (PostgreSQL), Bash (learning), HTML, CSS, JavaScript (basics)

Frameworks & Libraries: FastAPI, Pydantic v2, Uvicorn, Pandas, NumPy, pytest, Tkinter

Databases: PostgreSQL, relational data modeling, complex SQL queries, data normalization

Development Practices: OOP, SOLID, REST API design, Spec-Driven Development (SDD), unit testing, type hints, data validation, async/await

Tools & Version Control: Git, GitHub, GitLab, Docker (familiar), VS Code

PROFESSIONAL EXPERIENCE

Senior Campaign Specialist & Automation Validation

Catalina Marketing — Costa Rica | Nov 2023 – Dec 2025

- Automated data validation and verification routines for high-volume digital campaign systems, maintaining a record of zero critical delivery errors.
- Managed complex programmatic configurations in enterprise platforms (Salesforce, WordPress), applying data mapping and normalization techniques to guarantee data integrity.
- Analyzed structured data sets and API integrations across campaign deployment workflows; promoted ahead of schedule for risk assessment and operational precision.
- Mentored peers in data verification techniques and workflow optimization.

QA Automation & Data Validation

Cheetah Digital — Costa Rica | Sep 2021 – Oct 2023

- Designed and executed automated validation frameworks and test scenarios for enterprise email platforms; the resulting QA framework reduced campaign review cycles by 25%.
- Managed large live datasets, list segmentation logic and platform configurations with 100% delivery accuracy.
- Liaised as technical point-of-contact with engineering and operations teams across the US, Brazil, Europe and Asia.
- Ensured strict compliance with data governance and security standards while handling sensitive client data.

Data Operations & Campaign Specialist

Experian — Costa Rica | Oct 2019 – Aug 2020

- Supported data mapping, API integrations and secure database import/export pipelines for Fortune 500 accounts (Disney, Starbucks, The New York Times).
- Performed structured validation checks on multi-sourced consumer data to ensure record fidelity.

PROJECTS & PORTFOLIO

API-Learning-Lab — FastAPI REST API | github.com/ericksuper8000-source/api-learning-lab

- Building a REST API with Python 3.11, FastAPI, Pydantic v2 and Uvicorn; roadmap covers PostgreSQL CRUD, pytest quality gates and CI via GitHub Actions + GitLab CI (mirror repos).

WhatsApp Finance Assistant (caja-chica-bot) — FastAPI + Celery + OpenAI

- Backend for an AI assistant: FastAPI webhooks, Celery/Redis task queue, OpenAI Whisper + GPT-4o-mini, Google Sheets API and Docker Compose; 48 automated pytest tests; HMAC signature validation and rate limiting.

Sales Data Analyzer — Pandas/NumPy | github.com/ericksuper8000-source/python-data-analyzer

- Data analysis scripts: CSV ingestion, date parsing, group-by aggregations and top-seller reporting with Pandas/NumPy.

EDUCATION & CERTIFICATIONS

- DevOps Engineering Program — EducacionIT (in progress, expected 2027): cloud architecture, CI/CD patterns, software engineering lifecycle.
- Advanced AI-Assisted Engineering & Spec-Driven Development (SDD) — Big School: technical blueprint design, token-efficient architecture, AI tooling.
- Backend Architecture with FastAPI — specialized training (4 hrs): RESTful API routing, async logic, Pydantic validation.
- Relational Databases & SQL Design — intensive course (20 hrs): normalization, complex queries, data integrity.
- Advanced Python & Desktop Applications — independent study (80+ hrs): OOP, data validation, Tkinter GUI development.
- Database Analysis — Platzi (2020) · Web Development School — Platzi (2021).
- Technical Degree in Web Design — Universidad Fidélitas (2014).

LANGUAGES

Spanish: Native · English: Advanced / Full professional proficiency (daily cross-continental collaboration with US, EU and LATAM teams)
